

Acceptable use of Internet Policy

Technology is now a major part of daily life for most people and recent developments have enabled many new initiatives in the way churches use technology as part of their ministry. This opens up new and welcome opportunities to engage with people, but we recognise there are also risks associated with this. We should therefore all pay attention to how we can safeguard children and adults at risk to help ensure their online safety.

This policy should be used alongside our Safeguarding Policy and our Data Protection Policy.

Aim and purpose of this policy

The aim of this policy is to safeguard children and adults at risk when we are ministering on behalf of the church through the internet, social media, or mobile devices, and to provide guidance on our approach to online safety.

Who this policy applies to

- All those in the order, and associated with the order, working with children and adults at risk
- Those involved in managing IT systems on behalf of the order and within friaries and church settings.
- All those engaged in any form of online ministry, including group activities.

Scope of the policy

The policy covers the following areas:

- IT systems and resources
- electronic communications and use of social media
- video conferencing
- livestreaming and use of recorded video
- appropriate use of images online
- responding to online safety concerns.

Definition of online abuse

Abuse that is facilitated through technology like computers, tablets, mobile phones and other internet-enabled devices. It can happen anywhere that allows online digital communication.

Examples can include:

- bullying/cyberbullying
- sexting
- emotional abuse
- sexual abuse
- financial exploitation
- sexual exploitation
- scamming
- grooming and harassment.

It is possible that victims may not always understand that they are being abused in this way. The impact can be significant however, particularly in the way it may create fear and isolation.

We will maintain and use our IT resources to support good safeguarding practice

This covers both the hardware and software used within the church, along with decisions about the use of particular apps, services or websites. This policy does not try to cover all aspects of IT use but highlights actions we will take to support safer practice.

This will include:

- reviewing and updating the security of our IT systems regularly
- risk assessing any emerging new technologies before they are used within pastoral ministry.
- installing filtering software on devices owned and used by the order or churches as appropriate
- reminding staff and volunteers of the need keep login and password details secure.

If the friary or parish runs activities where children or adults will be using church-owned devices, they will be made aware of what is acceptable usage and will agree not to:

- search for and/or enter pornographic, violent, racist or hate-motivated websites
- retrieve, send, copy or display illegal or offensive material
- use obscene language
- violate copyright laws
- trespass in folders, work or files belonging to others
- harass, insult, bully or attack others
- damage devices, systems or networks
- use another user's password
- use computers for unapproved commercial purposes.

We will promote safe use of electronic communications and social media

This will include:

- using clear unambiguous language to reduce the risk of misinterpretation
- keeping copies of messages
- obtaining parental/carer consent for email or text contact with children
- avoiding communication outside of specific hours eg after 9pm
- using church accounts where possible instead of personal ones
- all social media interaction between workers (paid or voluntary) and children or adults at risk will be limited to church-administered groups
- all participants to be above the minimum age limit for the social media platform being used
- workers will take care with their social media privacy settings to prevent participants seeing personal information which is not linked to communication within the group.

We will create safe online spaces when using video conferencing or video calls

We will follow safeguarding practices as outlined in our safeguarding policy regarding use of video calls.

One-to-one calls

One-to-one communication via video with a child or adult at risk is the equivalent of meeting that person in a room alone with no one around. This must be avoided, and any child or adult at risk must be accompanied by a responsible adult. Appropriate boundaries and safeguards must be in place at all times, for example:

- have an additional adult in the room with the caller at all times
- insisting that a parent or carer to be present with the child or adult at risk
- keep a record of when meetings take place, length of meetings, frequency.

Group video calls

We will take appropriate measure to ensure the safety of participants in our group activities via video call or video conferencing. This will include:

- communicating expectations around appropriate behaviour to participants
- ensuring there are at least two adults on a call before a child or adult at risk joins
- using organisational profiles and devices wherever available rather than personal accounts
- not recording group calls unless there is a compelling reason to do so
- terminating a call if necessary (eg problematic behaviour by uninvited visitors).

We will apply appropriate safeguards when livestreaming or using recorded video

We will follow the good practice regarding livestreaming and recordings. This will include:

- ensuring anyone appearing in livestream or recorded video has given appropriate consent
- ensuring people know if an event is being recorded and giving them an opportunity to move to the designated area where they will be out of camera shot
- using group shots of the congregation and not singling out any individual.

We will ensure appropriate use of images online

We will follow the good practice regarding the use of images taken during church activities. In relation to online use of images, this includes:

- ensuring appropriate consent is obtained before posting any images online
- ensuring that children or adults at risk cannot be individually identified by any personal details
provided alongside the images
- discussion with parents and children about appropriate use of images eg where children may take pictures of each other during an activity.

We will respond appropriately and sensitively to all online safety concerns

In the event of concern that there may be an online safety incident of any kind, we will follow the process set out on our safeguarding flow charts for responding to safeguarding concerns.

If anyone is in immediate danger, this will be reported to the police or other statutory services straightaway.

Other concerns will be reported to the Designated Safeguarding Lead and/or the Order's Safeguarding Lead, who will seek advice on what action is needed. This will be reported to the RLSS.

We will provide support to those affected, seeking advice from the RLSS or other specialist services as required.

Review

This policy will be reviewed annually, updated as required and adopted by the church meeting.

Date of most recent review: March 2026

Date of next review: March 2027
